

WIKTORIA PEJŚ

FULL STACK DEVELOPER

ABOUT ME

I'm a creative full-stack developer with a solid coding foundation, specializing in JavaScript. My background in Business Computing and Entrepreneurship adds a business perspective to my technical expertise. I excel in crafting robust digital solutions, combining technical prowess with practicality. I thrive in teamwork, drawing inspiration from collaborations for optimal results. I'm driven by challenges, and committed to learning and professional advancement. I embrace new opportunities to develop myself.

EXPERIENCE

FREELANCER | 2020 - 2023

- Completed commercial projects for clients using WordPress.
- Developed proficiency in client communication, project management, and meeting client expectations.
- Effectively translated client requirements into actionable development tasks, resulting in satisfactory outcomes.
- Gained valuable insights into the dynamics of client interactions and project delivery.
- Built non-commercial projects and managed the entire development lifecycle of the application, from concept, and UX/UI design to implementation.

KEY PROJECTS

HypeFriends - rental app

- Worked with technologies such as HTML, CSS, TailwindCSS, ReactJs, Node, Express, Vite, MongoDB.
- The rental clothes application allows users to register, login, rent clothes, list new items, and perform searches.
- Successfully managed the project lifecycle, leading to a fully functional application.

Recipe Buddy - calorie count app

- Worked with technologies such as HTML, CSS, Node, Express, MySQL
- Developed a user-friendly application that allows authenticated users to share the nutritional values of products.
- A calorie count app called "Recipe Buddy" was created where users can submit nutritional information for products and then count calories for selected ones.
